The Human Resource Manager
GCL Environmental Limited

Calgary, Alberta,

Hello,

I am writing to express my interest in the internship opportunity at GCL as a Master of Engineering in Chemical Engineering student at the University of Calgary. With a strong academic background, relevant work experience, and a passion for the chemical industry, I am eager to contribute to your esteemed organization while furthering my professional development.

I have accumulated 10 years of experience as a Production Engineer in an aluminum smelter, Lubricant manufacturing company, and Cocoa processing company in Ghana. In these roles, I successfully executed product scale-up activities from batch to commercial levels. I became proficient in conducting demo batches in laboratory settings to assess feasibility and optimize processes.

My responsibilities included conducting utility and power calculations, selecting equipment, mapping processes, and performing stage-wise mass balance to optimize resource utilization and budgeting. As part of a collaborative team, I supervised a production line made up of a total of 80 technicians on a shift basis. I monitored on-site operations to ensure adherence to safety and quality standards. Furthermore, I engaged in HAZOP studies to identify and mitigate potential process hazards, thereby improving overall plant efficiency.

These experiences have equipped me with valuable soft skills, including effective communication, teamwork, and the ability to thrive under pressure. I am confident that my background and skills will allow me to make meaningful contributions to GCL.

Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to your team.

Sincerely,

Mohammed Saed Sidibe
