SOLUTION ORIENTED CHEMICAL AND PRODUCTION ENGINEER, SAFETY PROCESS AUDITOR AND LINE MANAGER

CAREER OBJECTIVES

An individual with an interest in studying and expanding knowledge in Industrial Engineering with an enhanced skill set on effective and creative problem-solving skills and abilities in areas of Manufacturing, Engineering with a focus on causing a positive impact/improvements/developments on industries in Ghana or the world at large through designing, developing, implementing and improving integrated systems that include people, materials, information, economy, finance, management, equipment, safety, health, and environment.

Research Interest Areas: Financial & Energy Engineering, Human Factors & Safety Engineering, Lean Manufacturing, Advanced Quality Control, Advanced Concepts in Quality Improvement, Reliability and Maintenance for Design and Manufacturing, Industrial Systems, Operations Engineering & Management, Policy Planning, Production Engineering, Quality & Reliability Engineering, Process control and optimization.

QUALIFICATIONS AND PROFILE

Summary of Qualifications/Experience in the past 10 years:

- BSc. Chemical Engineering.
- Safety, Process /Production Engineer and Line Manager

Summary of Profile (Character Traits or Competencies): An adaptable, well-organized, reliable and self-motivated **Chemical Engineer/Manager/Supervisor** at Volta Aluminium Company Ltd (VALCO) in Ghana, providing the leadership, management skills, and technical knowledge in mobilizing human and physical resources to achieve department/Plant objectives, enforcing policies and procedures that guide and supports ISO 9001:2015 and Occupational Safety and Health Administration (OSHA) standards/ guidelines, monitor service and staff performance about standards, policies and procedures. Build a strong team focused on operational and customer service excellence to achieve Plant Key Performance Indicators (KPIs) without overlooking economy, and safety. Effectively manage all resources (people, financial, material and time) to ensure maximum efficiency in planning, forecasting, allocation and execution.

EDUCATION

MEng Chemical & Petroleum Engineering
University of Calgary, Alberta, Canada

(September 2024 – Present)

BSc. Chemical Engineering
Kwame Nkrumah University of Science and Technology, Ghana

(Graduated in June 2014)

PROFESSIONAL OR WORKING EXPERIENCE

Line Manager/Engineer

Volta Aluminium Company Limited (VALCO)

(January, 2023- August 2024)

- Overseeing production processes.
- Planning production schedules for four production shifts and ensuring production schedules are adhered to.
- Ensuring aluminium produced meet customers standards.
- Estimating cost and preparing budgets for production and safety resources.
- Training and evaluating performance of assistant managers
- Making decisions about equipment use and maintenance.
- Managing teams and processes to meet and exceed KPIs including but not limited to Current Efficiency, Amperage, Voltage/Cell, Carbon Consumption, Bath Temperatures, Liquid Level Conformance, Anode Reference Conformance, and Metal Purity etc...

Production Engineer /Shift Supervisor

Volta Aluminium Company Limited

(September, 2014-December 2022)

- Efficiently managed a crew of 13 throughout the shift to meet production target.
- Fine tuning of individual cell voltages to ensure effective use of power.
- Involved in modifying SOPs with pot operators and other employees during the company's ISO certification process.
- Ensured crew complied with SOP, reporting LTA and near misses in line with PPE checks.
- Ensured hand over of good house – kept smelter zone to next shift.
- Coordinated with cast house and rodding plant for requirement of molten metal and anodes respectively during the 12hr shift.
- Preparing shift reports on metal produced, anodes used downtime and equipment status.
- Troubleshooting to identify exceptions in cells and taking steps to correct them to optimize production.
- Coordinate with rectifier station to ensure right amount of electric power is supplied to the pot room.
- Monitoring plant energy consumption and raw material quality
- Designing troubleshooting guidelines for new processes
- Managing departmental KPIs and reviewing them when need be.
- Coordinating audit preparations, training of staff, internal audits and internal corrective actions processes.
- Analysing data, historical documents to improve product performance and quality
- Planned and executed cell lines restarts without any injury

Intern

Tema Lube Oil Company Limited

(April 2014 – June, 2014)

- Inspection and testing of raw materials including testing additives and base oils used for blending of lubricants.
- Performing test such as viscosity, total base number, density, demulsibility, metals and colour on finished products
- Documentation and writing of weekly report on finished products

Intern

Cocoa Processing Company

(April, 2013 – June, 2013)

- Ensured that packaging materials are of appropriate dimensions and has good barrier properties.
- Physical and chemical analysis (fat, moisture, ash, sugar, PH, free fatty acids, fineness, shell content) of cocoa beans and chocolate
- Preparation of solutions and microbiological analysis. (Total plate count, coliform test etc.)

COMMUNITY / VOLUNTEER ACTIVITIES (NON-PAID) /LEADERSHIP EXPERIENCE

- National Vice President of Fulani Youth Association of Ghana(FUYAG) **(2021-Present)**
- Yearly Forums and Programmes Held in Senior High Schools **(2012 - 2015)**

AWARDS /PROJECTS/ACHIEVEMENTS/TRAINING

- **First Aid &CPR/AED Level C Training (Alberta, Canada) (Dec 2024)**
- Project on using fume ore, which was a waste to produce aluminium, generated a revenue of \$100000 for Valco daily. **(April 2023)**
- Project on the use of big butts (savers) to bake a patched cell which saved Valco \$18000 per cell. **(February 2023)**
- Improved metal purity from below 70% P1020 to 90% plus P1020 and better grades for nine months continuously.
- Managing people for results training by Ghana Institution of Engineering (GHiE) **(2022)**
- Anode production process by R&D Carbon (Switzerland) **(2019)**
- A Week of Industrial attachment with Aboadze thermal plant **(2014)**
- Project on plant design for the production of olefins and ethanol from wet natural Gas **(Final year Undergraduate project, 2014)**
- Project on fortifying local foods (bread, kenkey, porridge) using watermelon seeds. **(Third-year Undergraduate project, 2013)**
- Part of a team of engineers that made a current efficiency of **95.18%** on P69 operated cells for two consecutive months, exceeding the plant KPI of **92.0%** by working on feed times to ensure lean feeding **(March-April,2023)**

PROFESSIONAL MEMBERSHIPS

- Ghana Institute of Engineers
- National Society for Black Engineers
